

XLIV.—ALPHABETICAL INDEX TO THE PRINCIPAL RIVERS OF THE UNITED STATES.

BY CHAS. W. SMILEY.

This is in reality an index to the classified list of rivers and their tributaries presented on pages 91-202 of this volume, and the references are to the classification there used. In order to avoid the constant repetition of the words "river," "creek," &c., exponent figures in small type have been placed against each name to denote the character of the body of water, viz :

¹ River. ² Creek. ³ Lake. ⁴ Bayou. ⁵ Wash.	⁶ Brook. ⁷ Branch. ⁸ Pond. ⁹ Bay. ¹⁰ Run.	¹¹ Sound. ¹² Slough. ¹³ Stream.
---	--	--

The work of preparation of this index has been done very largely by Messrs. S. S. Alden, C. E. Latimer, and E. Y. Davidson.

This index is believed to be a faithful guide to all streams named in the preceding article. It will be of considerable service in the work of the Commission, and it is hoped of others. It is manifestly impossible to note every little creek in the country, and in the omissions may have been included accidentally some of respectable size. If time should permit, the list could be much enlarged and improved. It is now presented as so much better than nothing and to meet a felt want.
