
RECORDS
OF THE
DREDGING AND OTHER COLLECTING STATIONS OF THE
U. S. FISH COMMISSION STEAMER ALBATROSS
IN
1901 and 1902.

List of abbreviations employed in these records.

Abbreviation.	Meaning.	Abbreviation.	Meaning.	Abbreviation.	Meaning.
alg	alga.	mi	miles.	Alb. Blk	Albatross pattern Blake beam trawl.
bk	black.	min	mineral.	4' Blk., 5½' Blk., etc.	4-foot Blake beam trawl, 5½-foot Blake beam trawl, etc.
botm	bottom.	mts	minutes.	Blk. Dr	Blake deep-sea dredge.
br	brown.	nod	nodules.	Boat dredge.	Boat dredge.
brk	broken.	oz	ooze.	Ch. Tg's	Chain tangles.
bu	blue.	p	pebbles.	D. N	Dip net.
c	clay.	part	particles.	Dr	Dredge.
choc	chocolate color.	posn	position.	E. L.	Electric light.
co	coral.	pter	pteropods.	Gl. N.	Gill net.
corln	coralline.	pum	pumice.	Hp.	Hemp.
crs	coarse.	r	rock.	L. B. T.	Large beam trawl.
dd	dead.	rad	radiolaria.	Op. Int	Open intermediate tow net.
dk	dark.	rd	red.	R	Reef collecting or reef collections.
estd	estimated.	rky	rocky.	S	Shore collecting or shore collections.
fms	fathoms.	rot	rotten.	S. B. T	Small beam trawl.
fne	fine.	s	sand.	Sh. Dr	Ship dredge.
for	foraminifera.	sft	soft.	Sig. S. M	Sigsbee sounding machine.
frag	fragments.	sh	shells.	Surf. N.	Surface tow net.
g	gravel.	slat	slate color.	Swbs	Swabs.
glob	globigerina.	sml	small.	Td. Int	Townsend intermediate tow net.
gn	green.	sp	specks.	Tg's	Tangles
gy	gray.	st	stones.	8' Tnr., 10' Tnr., etc.	8-foot Tanner beam trawl; 10-foot Tanner beam trawl, etc.
h or hr	hour.	stbd	starboard.	Tnr. Int.	Tanner intermediate tow net.
hrd	hard.	stf	stiff.	Tnr. S. M.	Tanner sounding machine.
lav	lava.	stk	sticky.		
lge	large.	vol	volcanic.		
lt	light.	wh	white.		
m	mud.	yl	yellow.		
mar.g	manganese.				

RECORDS OF THE DREDGING AND OTHER COLLECTING
STATIONS OF THE U. S. FISH COMMISSION STEAMER
ALBATROSS IN 1901 AND 1902.

In 1902 the dredging, trawling, and other collecting operations of the *Albatross* were all embraced within the limits of a cruise to the Hawaiian Islands in pursuance of investigations concerning the fishes and fisheries of that archipelago. In 1901 but four stations were occupied, all on the west coast of the United States.

In the following records all stations where apparatus was employed for the purpose of collecting natural-history specimens are given dredging numbers in chronological order, and each piece of apparatus used at each station is given a separate line.

The time of a sounding is the time when the plummet strikes the bottom by the ship's local time.

The time of a net or dredge haul is the hour when such apparatus is in place or position and the actual towing or dredging commenced.

In the case of open intermediate nets the time occupied in hoisting to the surface is also noted.

Where two surface nets were used the actual time that both nets were in the water together is given as if but one piece of gear were employed.

The remarks show how many single hauls of a surface net were made at each station.

Almost invariably the dredging stations were located by soundings at each end of the line, and a majority of the dredgings were on lines of continuous development.

The drift is the direction and distance traveled over the ground in the case of bottom gear, and through the water—after getting in position—in the case of other nets. No account is taken of the distance traveled by the ship while nets are being lowered or hoisted.

“Tanner with brace” is an ordinary Tanner beam-trawl frame with a T bar joining the upper sides of the runners near the heels, thus increasing the rigidity of the whole frame. This modification was suggested by Mr. A. B. Alexander.

The “Albatross-Blake beam-trawl frame” embraces a number of improvements on the old Blake frame, suggested by Commander Chauncey Thomas, U. S. Navy, and Mr. H. C. Fassett, U. S. Fish Commission.

Record of the dredging and other collecting stations of the Albatross in 1901 and 1902.

Heavy load mud; nets slightly torn from weight.

Trawl took bottom in 165 fms.; towed up steep slope to 41 fms.; bridle stops parted; net capsized and torn; no gear lost.

Almost a water haul; net evidently only on bottom a moment.

Heavy strains, but no damage done to gear.

Lining and inner net torn by short, quick surges.

Bridle stops parted on one runner; net and apron slightly torn.

Heavy strains; upper beam bent and frame bent and twisted; net complete wreck, but no gear lost.

Bridle stops parted; net doubled over upper beam, but not torn.

Record of the dredging and other collecting stations of the Albatross in 1902—Continued.
